INCORPORATING COMMUNITY VALUES AND CONCERNS INTO OUR EXPLORATION PRACTICES

We are committed to working alongside all stakeholders and community members that share an interest in our endeavours.

For more information and tenement maps head to our website:

RED ROCK AUSTRALASIA

**GOLD
EXPLORATION
BALLARAT
REGION**

- Red Rock Australasia has made applications for Exploration Licences across Victoria.
- We have a locally staffed and operated team in Ballarat, as part of a joint venture Pty Ltd company with London based shareholders.
- Minerals exploration is an integral part of the economic growth and benefits in Regional Victoria.
- In order to be sustainable both for the community, and environmentally, exploration and mining activities are tightly controlled through Earth Resources Victoria.

BALLARAT

The following map shows our granted tenements which fall in the Ballarat Area:

- EL7271 - South Ballarat
- EL7281 - West Ballarat
- EL7285 - North Ballarat

****EL7505, EL7506 and EL7507 fall inside EL7271****

We cannot and will not enter onto private land without the permission of landowners. If we ascertain we would like to explore onto private property we will contact and consult directly. However, most of our areas of priority fall on crown land.

These tenements cover land across the **Ballarat, Golden Plains** and **Moorabool** Shire councils.

Our Plan

At this stage our forecast workplan for the first 12 months of operation include the following activities classified as very **low impact**.

- Historic data Review and analysis
- Satellite Mapping
- Soil sampling - involves tablespoon sized samples of surface soil taken away for offsite analysis.

The Company is focused on seeking narrow vein gold opportunities that are amenable to underground mining methods with minimal surface disruption.
